

**INTERNATIONAL PHARMACEUTICAL QUALITY** provides in-depth coverage of emerging drug, biologic and combination product CMC and GMP issues and developments with a mission of helping advance and harmonize the quality regulatory process globally. Headquartered in Washington, D.C., IPQ is read at regulatory agencies, manufacturers, suppliers, consultants, law firms, and universities around the world.

IPQ tracks the industry/regulator dialogue at key international forums along with developments, initiatives, regulations, guidelines and standards in the quality regulatory arena to create a uniquely valuable resource for the intelligence gathering, knowledge management, and external advocacy needs of the pharmaceutical community.

IPQ's "actionable intelligence" is uniquely valuable for top thought leaders and decision makers who need to have in-depth awareness of the issues and their context to help shape regulatory policy and develop implementation strategies. Subscriber support allows IPQ, in turn, to make an important contribution to the efforts of key non-profit associations and public service organizations engaged in addressing the increasingly complex manufacturing and regulatory challenges for medicines in the global context.

All IPQ content is provided electronically and the substantial archive at IPQpubs.com is easily searchable. Links to documents referenced and cross-links to related previous IPQ coverage in the area are included, allowing readers to quickly dig as deeply into an issue and its context as needed.

IPQ's "**News Alerts**" provide links to the first few paragraphs of the stories newly posted online. Subscribers and license holders can click through to the full stories.

The "**Monthly Updates**" organize the stories that went online during the previous month and are an easy way for subscribers to keep up with the current critical developments impacting the quality regulatory process worldwide.

Included are "**Updates in Brief**" on recent developments in the CMC/GMP global arena with links to the referenced documents and to our related in-depth analysis. Also included is an annotated listing of FDA drug GMP warning letters and recalls as well as EU GMP non-compliance statements posted during the month.
